

Lonza

Director, SGIE Technology Lead Visp

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

Lonza in [Visp](#) is looking for a SGIE Technology Lead Visp. In this role you will be accountable for Subject Matter Expert (SME) support for Shared Infra & Ibex projects in Visp (process engineering and compliance to statutory provisions & local standards for billions of investments) as well as conduct, review, assess ideas/requests, feasibility and concept studies for infrastructure projects in pre CAR approval phases.

Key responsibilities:

- Set-up and manage a team of SMEs with the skill set:
- Process engineering and plant design expertise
- Competence center for technical compliance requirements like pressure equipment directive, non-electric ATEX, fire protection, ...
- Technical standards for the site Visp
- Provide input and support on technology and compliance aspects for Shared Infrastructure & Ibex projects in Visp. Review request to service providers and review/assess offers and deliveries.
- Conduct, review, assess ideas/requests, feasibility and concept studies for infrastructure projects in pre CAR approval phases
- Define, introduce and maintain unified technical standards across the Lonza Visp site in order to reduce investment, operating and maintenance cost and assure compliance
- Be an integral member and contributor to the Engineering Services Visp leadership team.
- Represent Lonza in the Engineering Committee BCI (sharing best practice platform for engineering & maintenance)

Key requirements:

- Master degree in Engineering (Biologics or Chemical), or similar, Process Engineering preferred
- A widely recognized SME in process engineering, plant design and statutory provisions & local standards
- Broad experience in planning and execution of capital projects incl. cooperation with contractors
- Fluency in English and German is required
- Very experienced in working in a highly matrix organization and complex set-up
- Capable of envisioning and designing new ways of working

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
