

I&C Technician Control Technician (m/f/d) - R61762

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

As an I&C Technician / Control Technician (m/f/d) BioAtrium you are involved in the planning and engineering phase of Mammalian Large Scale production. You are responsible for the introduction of the conditions and specifications of control technique for all related production campaigns.

Key responsibilities:

- Maintenance and troubleshooting of measurement and control systems
- Installation and calibration of measurement and control systems
- GMP-compliant activities, test, documentation and change management
- Preparation, presentation and active participation in periodic meetings

Key requirements:

- Qualification as an Electrician or Electrical Installer, Automation Technician or similar further qualification
- Knowledge of DeltaV would be an advantage
- Some work experience in the GMP related environment is preferable
- Independent, reliable and solution-oriented
- Ability to recognize risks in relation to security or compliance / GMP; as well as taking action to solve them
- Fluent English and/or German language

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
