

## Lab Technician (DSP)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are looking for a laboratory technician (m/f/d) for the DSP (Downstream Process Development) department at the Visp site. Our team develops purification methods for biomolecules. As a member of our team at Lonza Pharma, Biotech & Nutrition (LPBN) in Visp, Switzerland, you will plan and carry out laboratory experiments for the purification of proteins in close cooperation with the project teams.

#### Key responsibilities:

- Preparation and implementation of laboratory experiments
- Documentation and evaluation of the experiments
- Ensuring the technical and administrative maintenance of the operation, equipment and warehouse.
- Supervision and training of new team members (e.g. laboratory technician apprentices).

#### Key requirements:

- Laboratory technician training (EFZ) or a Bachelor in Life Sciences
- Experience in chromatography, TFF and filtration is an advantage
- Flexible, independent, good communication, teamwork skills and enjoy interdisciplinary collaboration.
- Working proficiency in English, German knowledge is an advantage
- Knowledge of MS Office (Excel, Word, PowerPoint) and an affinity for computer-aided laboratory systems.

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
