

## MSAT Associate Principal Scientist, Bioconjugates Process Expert for Capital Investment Project 80-100% (m/f/d)

### Job Description Summary

The site in [Visp, Switzerland](#) is growing and for our Biologics organization, we are currently looking for a MSAT BioConjugates Process Expert. Lonza has a strong track record in the manufacturing of BioConjugates from early clinical to large scale commercial supplies. Our dedicated Protein Conjugation Plant facility (PCP) is recognized as a center of excellence for Antibody Drug Conjugates (ADC) as well as other classes of BioConjugates. We are experiencing an increased demand in this area and as part of Lonza's Ibex® Dedicate model, new BioConjugation suites were built out within a pre-existing shell.

In the position of **Capital Investment Project MSAT Bioconjugates Process Expert**, you will make a difference by being responsible for the successful supervision, support and life cycle management of BioConjugates processes running in Lonza's facilities in Visp. You will play a crucial role in the network between the different departments as manufacturing, engineering and quality assurance. Become part of this exciting opportunity and apply now!

#### Key Responsibilities:

- Take responsibility as MSAT process expert in Capital investment projects.
- Participate the feasibility studies within a dedicated project team.
- Working as MSAT process expert in Capital investment projects for evaluating and assessing the design of manufacturing units.
- Main responsible for delivering all inputs required for the suite and equipment design.
- Responsible for implementation of the relevant GMP documents for the respective area.
- Deliver all inputs required for the specific projects from a process and GMP standpoint.
- Is responsible for permanent optimization of the project.
- By positive project evolution, is then responsible for the execution of the assigned product/project in the best possible time, quality and cost, in compliance with the relevant laws, regulations and guidelines regarding safety, quality, regulation, hygiene and the environment from a MSAT point of view.

#### Key Requirements:

- Master or PhD (preferred) in Bioconjugation, Biotechnology, chemical engineering, organic chemistry or related disciplines
- Intermediate experience in Bioconjugation, biopharma manufacturing, preferably in the area of BioConjugates or DSP (Mammalian or Microbial)
- Previous experience supporting capital investment projects
- cGMP experience and deep understanding of Bioprocess technology
- Excellent communication skills for interaction with customers and within the project organization
- Fluency in English required, fluency in German preferred
- Creative, agile, open-minded

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
