

## MSAT Bioconjugates Process Expert (f/m/d)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

The site in Visp, Switzerland is growing and for our Biologics organization, we are currently looking for a MSAT Bioconjugates Process Expert (m/f/d) to support our growth project Vibe-X, a customer-dedicated plant for a conjugated vaccine. In this role, you will be responsible for the successful commissioning of the facility and later realization of the PPQ and further production campaigns. You will play a crucial role in the network between the different departments as manufacturing, development, quality assurance and control. Become part of this exciting opportunity and apply now!

#### Key responsibilities:

- Deliver process know-how, scientific expertise as well as operational excellence with regard to biopharma API production
- Ensure right first time process technology transfer and manufacturability in cooperation with the project cross-functional team (PD, Ops, QA, QC, etc.)
- Change control management
- Support production campaigns and leading process troubleshooting on the manufacturing floor as needed
- Process optimization by regular data analysis and compilation of CPV and APQR with the support of the data manager
- Improve workflows and production assets by driving relevant innovation projects

#### Key requirements:

- Master or PhD (preferred) in Bioconjugation, Biotechnology, Chemical Engineering or related disciplines with a focus on organic chemistry
- Significant (multi-year) experience in Bioconjugation methodologies, biopharma manufacturing and / or process development, preferably in the area of Bioconjugates
- Hands-on experience with downstream processing, such as chromatography and filtration techniques.
- Strong analytical and problem-solving skills with the ability to interpret complex data and make sound technical decisions.
- cGMP experience and deep understanding of Bioprocess technology
- Excellent communication and interpersonal skills with the ability to work effectively in a cross-functional teams environment.
- Fluent in English, German would be an advantage
- Creative, agile, open-minded

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
