

## MSAT DP Internship

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

For our biopharmaceutical manufacturing facility, we are currently looking for students and young graduates who would like to do a traineeship in the pharmaceutical industry.

Duration: 8-12 months (applications for less than 8 months are not considered for this traineeship).

Key responsibilities:

- Support operational manufacturing activities with investigations, troubleshooting and process improvements
- Perform data collection and statistical analysis
- Plan and execute manufacturing study protocols and write reports
- Review and translate standard operation procedures
- Evaluate new process technologies and its implementation

Key requirements:

- Team player attitude and willingness to learn
- University degree with natural sciences background
- Interested in hands-on experience in biopharmaceutical manufacturing environment
- Drive for results and problem-solving oriented personality
- Strong analytical skills, knowledge of documentation and data analysis tools is a plus
- Fluent in English. German is an advantage
- Passionate about seeking a career in biopharmaceutical manufacturing

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
