

Lonza

Operator - R62662

Job Description Summary

Lonza is a global leader in life sciences, operating on three continents. **While we are driven by science, there is no magic formula for how we approach our work.** Our most valuable scientific solution is **our talented people who** collaborate and develop ideas that help other companies **improve lives.** **In return,** our employees manage their careers independently, **as their ideas—whether big or small—make the world a better place.** This is the kind of work **we want to be part of.**

A new production plant in the field of biotechnological production is being built at the Visp site. **For this project and the subsequent routine production,** we are looking for a motivated and resilient individual to join us as a vaccine production operator.

Start your career at Lonza today and apply to become an Operator.

Your tasks during the project phase:

- Support the project team in defining and setting up processes in the field of innovative vaccine production.
- Collaborate on the qualification and validation of new production areas and processes.

Your tasks in routine production:

- Adhere to relevant SOPs (Standard Operating Procedures) and regulations (e.g., hygiene concept, safety regulations)
- Independently operate the production plant and equipment entrusted to you, including their preparation, operation, and post-processing in accordance with SOP
- Perform microbiological environmental monitoring, in-process controls (IPC), and sample taking
- Monitor production processes, detect and report potential issues, and actively participate in continuous improvement processes
- Ensure and implement safety measures and behaviors
- Conduct GMP-compliant work and timely documentation of activities (e.g., computer systems (MES) or log books)
- Handle, clean, store, and inspect equipment

Your profile:

- Ideally, you have completed an apprenticeship in the pharmaceutical, chemical, or biotechnological field and/or have several years of experience in pharmaceutical production. Alternatively, career changers with a relevant apprenticeship or university degree are also welcome
- Experience in plant operation and in the GMP area/cleanroom is an advantage
- Safety awareness
- Fluent in German and/or English
- Willingness to work shifts (4 shifts)
- Ability to work in a team, reliability, and a high degree of personal responsibility
- Flexibility

Lonza's products and services positively impact millions of people every day. **For us, this is not only a great honor but also a significant responsibility.** **How we achieve our business results is as important to us as the results themselves.** At Lonza, respect is paramount, and we protect both our employees and our environment. **For us, success means morally justifiable progress.**

Lonza is joined by people who take on challenges.
