

Operator (technical background) (m/f/d)

Job Description Summary

Are you a skilled Maintenance Technician, Plumber, Heating Mechanic, Pipe Fitter, or other skilled technician, looking for a new challenge in a dynamic and rewarding environment? Join our team and advance your career in pharmaceutical production!

At Lonza, we operate across three continents, pioneering advancements in life sciences. Our success isn't just about cutting-edge science—it's about skilled technical professionals working together to create solutions with impact. We empower our team members to own their careers, fostering an environment where innovative ideas, big and small, make a real difference in the world.

At our Visp location in the stunning canton of Valais, Switzerland, we are seeking individuals with technical expertise who are eager to transition into the role of Biotechnologist. If you have experience with electrical circuits, machines and tools, a strong understanding of safety protocols, and the ability to follow detailed procedures, we want to hear from you!

Why join us?

- Be part of a leading pharmaceutical company that values and expands your technical expertise.
- Grow your skill set with hands-on experience in bio-pharmaceutical production.
- Work with a dedicated team and help up-skill colleagues with a less technical or mechanical background.
- Enjoy a flexible work schedule with a 4-shift pattern.

Key responsibilities:

- Engage in various functions within our production facilities while adhering to safety regulations and GMP quality standards.
- Identify, interpret, and resolve production deviations to ensure smooth operations.
- Execute production steps with accuracy, including detailed recording and calculations.
- Support and train new team members, sharing your knowledge and expertise.

What we're looking for:

- Experience as an operator, technician or mechanic with technical and practical knowledge of machines and tools.
- In possession of certain technical licenses. For example a plumber license, HVAC technician license, welding certificates etc.
- A strong commitment to safety-conscious work practices.
- The ability to work well with your hands
- To be thorough and pay attention to detail
- The ability to work well with others
- Understanding of process engineering principles.
- Fluent in English; German is a plus.
- Willingness to work in a 4-shift pattern with flexible scheduling.

Ready to Take the Next Step?

Make a difference with your technical and hands-on expertise. Join us and help shape the future of pharmaceutical production!
