

Lonza

Postdoc QC Biologics

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We have recently been confirmed as the global manufacturing partner for the production of the Moderna vaccine against coronavirus. As a partner, we are enabling a tenfold increase in production capacity. We are fortunate to have the opportunity for sustainable growth at a time of great uncertainty for many companies. Because of this new collaboration, our work will have a critical, direct and long-lasting impact on addressing this global pandemic. Become a part of it and apply for the position as **Postdoc QC Biologics** in [Visp \(CH\)](#).

Key responsibilities:

- Performs analytical testing methods in a GMP environment.
- Provides scientific/technical leadership at project level by making scientific decisions for complex scientific problems and within projects.
- Collects and analyses interdependent and complex data and draws conclusions from the results. Prepares reports and makes presentations as appropriate to establish best practice across the function.
- Important role within QC for a scientific area or technique, by solving scientific problems within QC and at project level.
- Performs other tasks as directed

Key requirements:

- PhD in biology, biochemistry or a comparable subject area
- Experience in protein analysis (UV, HPLC, ELISA, cell based assay, etc.)
- Initial experience in the GMP area would be desirable
- Ideally experience with IT/OT systems in quality control, such as LIMS, Empower, etc.
- Confident communication in German and English

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
