

QA Process Validation Specialist PQR (f/m/d) (80-100%)

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

The site in Visp, Switzerland is growing and for our validation organization, we are currently looking for a QA Manager for Process Validation. In this role, you will be responsible for continued process verification and Product Quality Reviews (PQRs) for small molecules and biologics.

Key responsibilities:

- Consistent implementation and maintenance of the Continued Process Verification (CPV) and Product Quality Review (PQR) programs at Visp
- Training and support of the validation teams with the preparation of the CPV/PQR reports, to ensure harmonization and compliance
- Preparation of CPV/PQR documents according to Lonza procedures
- Reviewing and approving final CPV and PQR documents

Key requirements:

- Bachelor degree in chemistry or related scientific field
- Ability to work accordingly to good science
- Proficiency in writing scientific reports in English
- First experience in GMP compliance is preferred
- Experience with statistics or statistical background would be an advantage
- Professional English language skills necessary

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
