

# Lonza

## Robotics and Automation Lead (f/m/d) (80-100%)

### Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are currently looking for a Robotics and Automation Leader at our site in Visp to bring Lonza to the next level of 21st century automation and robotics in the pharmaceutical industry.

Key responsibilities:

- Challenging existing manual practices and watching out for the best automation and robotics within the pharma industry as well as other industries to improve current practices
- Driving the standardization and the efficiency in Quality Control (QC)
- Drive the digital transformation of quality processes in close collaboration with the digital transformation group, global QMS and global IT
- Since projects in this area are of strategic importance, a correspondingly high level of management attention is given here

Key requirements:

- Bachelor of Science or Master of Science in a scientific field
- Proven success of implemented automation and robotics projects in the GMP regulated environment
- Experience in communicating with interfaces of different systems (LIMS, iLab, SAP)
- First experience with Robotic Process Automation (RPA), use of Bots and artificial intelligence
- Fluent business language skills in English and German

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege, but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
