

Scientist - Early Development Bioconjugates (m/f/d)

Job Description Summary

Today, Lonza is a global leader in life sciences operating across three continents. While we work in science, there's no magic formula to how we do it. Our greatest scientific solution is talented people working together, devising ideas that help businesses to help people. In exchange, we let our people own their careers. Their ideas, big and small, genuinely improve the world. And that's the kind of work we want to be part of.

We are currently looking for a scientist (m/f/d) to join our early development team for bioconjugates in Visp, Switzerland. In our team, you will be responsible for the planning and execution of laboratory experiments and you collaborate closely with project teams.

We are looking for you if you are a great team player, have the necessary skillset, and like contributing to bring bioconjugate-based biopharmaceuticals to the patient!

Key responsibilities:

- Plan, perform and document laboratory experiments
- Evaluate data for the preparation of reports or presentations
- Provide scientific support to lab technicians to ensure scientifically sound execution of experiments
- Support project leaders in the planning and organization of projects and experiments

Key requirements:

- BSc. or MSc. degree in chemistry, biotechnology or a related field
- Good understanding of general laboratory routines
- Having successfully completed an apprenticeship as a laboratory technician, coupled with a university degree, adds significant value
- Experience bioconjugation, protein handling, protein chromatography, is a plus
- Sense of accuracy, quality, and initiative
- Very flexible, reliable, and proactive with strong team work skills
- Structured, focused and well-organized working attitude; open-minded for new ideas and suggestions; agile, highly motivated and dynamic; solution-oriented
- Fluent in German; good written and oral communication skills in English.

Every day, Lonza's products and services have a positive impact on millions of people. For us, this is not only a great privilege but also a great responsibility. How we achieve our business results is just as important as the achievements themselves. At Lonza, we respect and protect our people and our environment. Any success we achieve is no success at all if not achieved ethically.

People come to Lonza for the challenge and creativity of solving complex problems and developing new ideas in life sciences. In return, we offer the satisfaction that comes with improving lives all around the world. The satisfaction that comes with making a meaningful difference.
